

Product Information

SCHMETZ

Effective from now SCHMETZ is offering an innovative new product to the world of home sewing --

- the **SCHMETZ GOLD Embroidery Needle** with a hightech compound surface coating from ***Titanium Nitride/Hardchrome***

in needle sizes 75/11 and 90/14

The new surface coating for household sewing machine needles has extraordinary properties which makes it very suitable for the sensitive field of embroidery.

What can your customers expect?

A 4x harder needle surface than normal embroidery needles	The SCHMETZ GOLD Embroidery Needle even is forgiving small operator's faults as well as touching the throatplate
An excellent wear resistance of the needle	Even big embroidery patterns with thousands of stitches can be achieved without exchanging the needle
A super hard needle tip	An even stitch pattern appearance from the first to the last stitch Embroidering without fabric damage caused by a worn needle tip
A big hard-coated eye	Easy threading even of heavy yarns Easy yarn flow through the needle eye Less yarn abrasion and a clear pattern
An anti-adhesive surface	No clogging of the needle eye and long groove when embroidering through glue coatings and foam
Standard dimensions	Can be used on all popular household sewing machines Especially suited for sewing machines with special embroidery programs
